It also displays a certain weakness for Yerba del Diablo (ie, "Weed" of the devil), a ally "that confers" superfluous power "on the knowledge seeker. Where am I going with this? And of course, the fundamental claim of the book - that reality & "much more malleable" than we might first think - & "probably true in a rather general sense. All this will render a good novel? That's where things get fucked. Tell me this, Carlos! Tell me what! Yet the most serious problem with the book Qualla Fiction & that its author never admitted it as such. Just pick up a copy of the doors of perception or hallucinations, why not? An addendum.but what was the truth, the man? On what standard of "truth " can be his point of view be "wrong"? Moreover, Castaneda speaks a lot about power, and how people's experiences in "reality" "non-ordinary" have "pragmatic" value in the "ordinary" world. As far as I can tell, the following two propositions should affect most people as uncontroversial: (1) From writing bestsellers for washing blinds for washing vulnerable girls, Castaneda certainly possessed a considerable degree of power over others, and (2) how & & nu id elorap elleN .at ad enepid otseuq ,eneB" omisenamaics o aigolocisp ,osac la olleppa odneccaf inoizisoporp eud etsesq erageips ailgov ut ehc aiS atset ni eradna "Aicsal enif allA ,enolas led olocitra otseuq initiate. "If he had not presented his stories as a fact it is unlikely that the cult would exist. However, as an essayist, Castaneda's exploration of hallucinogens and spirituality suffers from several important flaws. But by my logic, in the '70s, Carlos Castaneda, a young anthropologist at the University of California, was the crap among hippies, new ages and aspiring academics who desperately wanted to get rid of their suffocating tweed. I don't think so. Perhaps the most striking of these concerns the description of Don Giovanni as a "Yaqui sorcerer", despite the fact that Mexico's current Yaqui culture is not at all comparable to that described by Castaneda. Although Castaneda isn't the best writer, he's not that bad; and the various hallucinatory experiences he describes tend to be bizarre enough to compensate for any weaknesses in

his prose style, or its affiliates Given the reality of the current refugee, audiobooks offer an alternative way to access to books. But to my logical, unenlightened mind, the following statement seems to be valid; since the Teachings of Don Giovanni claim to be nonfiction or fiction, and since these possibilities are mutually exclusive (or at least could easily be defined as such), then we may ask ourselves what acknowledgements and/or criticisms apply to each of them, them, and whether they apply to both. We should be able to forward a general assessment of the book that is not based on suspicious factual evidence. Not much. Now? Native Americans in Mexico have had a hard time with oppression, colonialism and so on. Greater misadventure! And for those who are interested, Richard DeMille has dedicated two whole books to chronicling other factual gaffees. So Castaneda is a rather poor anthropologist, a defect that extends to his treatment of 'otudrep 'otudrep orol rep innavoig noD id otnemal li rep otnavelir eresse ebhertop noN .evitanretla of "Indian" sorcerers, or individual preference for knowledge than power? And why introduce the mysterious 'La Catalina' (with quotation marks) without doing anything significant with her? If this had been thirty years ago, perhaps I would recommend the reading of Castaneda as a source of conversation material. At that the irreducible castanese objected: "But, like, what is the truth, man?" I don't want to be terribly involved in the debate. Holy academic attitude, Batman! If phrases like Å «corroboration of the rule meant the act of verifying it, the act of attesting its validity confirming it pragmatically in an experimental way» try something, it is that the professors of the ucla that they originally allowed himself passing this nonsense to Castaneda's degree thesis are guilty of coarse charlatanism and intellectual dishonest. Let's start ... Case # 1: It is an essay. For many readers, the death bell of Castaneda sounded when most stories of him turned out to be "actually speaking" "completely and completely bullshit. In Don Giovanni's teachings, Castaneda proposes a epistemology according to which the concepts of «truths' and« reality »do not mean what we think. ... more but now? As a novel, it is pretty decent, but potentially harmful. Apart from some applicants and annoying discussions of the second year on the nature of objectivity, he does not even try to face the political and social dimension of knowledge å å å å å å «Yaquiaa» (or other). And as an anthropologist, Castaneda should not have more attention to gender standards (sexists) that pervading most of the teachings of the benefactor of him? And why© oh why submitted the reader to abominable torture that Å the ÅStructural AnalysisÅ"? As nonfiction, it became incredibly more dangerous!Å". Conclusions.As a work of anthropology, The Teachings of Don Juan is not suitable for cleaning a monkey's ass.
